INDEX TO VOLUME 38

AUTHORS INDEX

In the index, following the author's name, the title of the subject is given as it appeared in the JOURNAL.

A

ABILDSKOV, J. A., BURCH, G. E., CRONVICH, J. A., AND JACKSON, C. E. An evaluation of the spatial vectorcardiogram of normal young men, 783

ADAIR, DORIS M. (*See* RHOADS, BILLINGS, AND ADAIR), 942

ADCOCK, JOHN, HALEY, RAPHAEL R., AND WINTHROP, N. DAVEY. The Middlebrook hemagglutination test for tuberculosis. An evaluation in normal subjects and in patients with tuberculosis, 736

AINSLIE, JOHN D., FRANCIS, THOMAS, JR., AND BROWN, GORDON C. ACTH in experimental poliomyelitis in monkeys and mice, 344

AJELLO, LIBERO, GRANT, VIRGINIA Q., AND GUTSKE, MARK A. The effect of tubercle bacillus concentration procedures on fungi causing pulmonary mycoses, 486

ALBRECHT, ROBERT M. (*See* KORNS AND ALBRECHT), 617

ALBRIGHT, EDWIN C. (*See* LARSON, COULSON, AND ALBRIGHT), 827

ALDRICH, S. L. (*See* ANDERSON, ALDRICH, HALPERN, AND DOLKART), 585

—. (*See* GILBERT, ANDERSON, ALDRICH, AND GOLDBERG), 813

ALLEN, J. GARROTT. (*See* BASINGER AND ALLEN), 784

ALVAREZ, ELSIE. (*See* FREEMAN, DRAIZE, AND ALVAREZ), 262

ALVING, ALF S. (*See* BRENNECKE, ALVING, ARNOLD, BERGENSTAL, AND DEWIND), 795

ANDERSON, L. H., ALDRICH, S. L., HALPERN, BERNARD, AND DOLKART, R. E. Venous catheterization for continuous parenteral fluid therapy, 585

ANDERSON, LEIGHTON L. (*See* BLOUNT AND ANDERSON), 792

ANDERSON, LYNN. (*See* GILBERT, ANDERSON, ALDRICH, AND GOLDBERG), 813

ANDREWS, CARL E. (*See* POTTS, RIKER, DEBORD, AND ANDREWS), 281

ANNINO, JOSEPH S. The effect of serum proteins on the determination of chloride by mercurimetric titration, 161

ARMBRUST, CHARLES A., JR. (*See* HOWE, ARMBRUST, AND MCPEAK), 542

ARMSTRONG, B. E. (*See* HALL, ARMSTRONG, SANFORD, AND BUTLER), 817, 818

ARNOLD, JOHN. (*See* BRENNECKE, ALVING, ARNOLD, BERGENSTAL, AND DEWIND), 795

B

BAKAY, LOUIS, SELVERSTONE, BERTRAM, AND SWEET, WILLIAM H. Intravascular distribution of NA^{24} injected intravenously in man, 893

BALDRIDGE, G. DOUGLAS, AND KLIGMAN, ALBERT M. A critical evaluation of the toxicity of pemphigus serum (Pels-Macht test), 128

BALLARD, SALENA. (*See* FOSTER, SIGEL, HENLE, AND STOKES), 359

BARKER, NELSON W. (*See* HAUCH AND BARKER), 550

BARROTT, GWENDOLYN W. (*See* CONN, LOUIS, FAJANS, JOHNSON, BARROTT, HOGG, BLOOD, AND WEISS), 799

BARROWS, CHARLES. (*See* CONLEY, KREVANS, CHOW, BARROWS, AND LANG), 84

BARTLETT, JANE E. (*See* BRAUDE, SANFORD, BARTLETT, AND MALLERY), 794

BARTON, EVAN M. (*See* RUGGIE, MONTGOMERY, BARTON, MAYER, AND MIZENBERG), 945

BASINGER, CLAIR, AND ALLEN, J. GARROTT. The effect of intravenous injection of thromboplastin and thrombin in dogs, 784

BASS, JOSEPH A. (*See* WRIGHT, DODD, BOURONCLE, ELLIOTT, BAXTER, AND BASS), 962

BATTLE, JOHN D., JR. Hereditary spherocytosis: pathogenesis of the "active crisis," 784

BAXTER, J. ALBERT. (*See* WRIGHT, DODD, BOURONCLE, ELLIOTT, BAXTER, AND BASS), 962

BAYRD, EDWIN D., STICKNEY, J. M., HALL, BYRON E., AND WATKINS, CHARLES H. Clinical results and complications of triethylene melamine therapy in leucemia and allied disorders, 785

BEAN, WILLIAM B., FRANKLIN, MURRAY, AND DAUM, KATE. A note on tryptophane and pellagrous glossitis, 167

BEARD, EARL F., BURCHELL, HOWARD B., WOOD, EARL H., AND CLAGETT, O. THERON. Study of hemodynamics in coarctation of the aorta with use of dye dilution and direct intra-arterial pressure recording methods, 785

—, WOOD, EARL H., AND CLAGETT, O. THERON. Study of hemodynamics in coarctation of the aorta using dye dilution and direct intra-arterial pressure recording methods, 858

BECK, WILLIAM S. (*See* VALENTINE AND BECK), 39

— AND VALENTINE, WILLIAM N. Biochemical studies on leucocytes. II. Phosphatase activity in chronic lymphatic leucemia, acute leucemia, and miscellaneous hematologic conditions, 245

BECKER, G. (*See* TOOR, STAMLER, BECKER, AND COHN), 956

BEIERWALTES, WILLIAM H. (*See* REES AND BEIERWALTES), 941

— AND KNORPP, C. T. Lack of selective uptake of radioactive iodine, phosphorus, and copper by melanomas in mouse and man, 786

BENNETT, ALENE. (*See* MAY, TSAI, BENNETT, MEADOWS, AND GREGORY), 927

BENNETT, GRANVILLE A., ZIVIN, SIMON, STECK, IRVING E., AND MONTGOMERY, MAX M. An evaluation of the effects of cortisone on the subcutaneous nodules of patients with rheumatoid arthritis, 787

BENNETT, H. H. (*See* SPURR, BENNETT, O'BARR, AND DAVIS), 953

BERGENSTAL, DELBERT M. (*See* BRENNECKE, ALVING, AENOLD, BERGENSTAL, AND DELBERT), 795

BERNSTEIN, LIONEL, FOLEY, EDMUND F., AND HOFFMAN, WILLIAM S. Renal function in diabetic coma: lower nephron nephrosis without oliguria, 12

BERRY, JOHN W. (*See* GLASER, BERRY, LOEB, AND WOOD), 363

BEST, MAURICE M. An objective method of drug evaluation in coronary artery insufficiency results with Khellin, 788

BEST, WILLIAM R. (*See* LIMARZI, PAUL, AND BEST), 922

—. (*See* PRESLEY, BEST, PONCHER, AND LIMARZI), 939

—, LIMARZI, LOUIS R., AND PONCHER, HENRY G. Longevity in leucemia, 789

—, —, AND —. White blood cell counts in the leucemias, 789

—, MUEHRCKE, ROBERT C., AND KARK, ROBERT M. Clinical and statistical evaluation of four-hour eosinophil response tests, 790

BICKEL, WILLIAM H. (*See* POLLEY, BICKEL, AND DOCKERTY), 937

BIEHL, J. PARK, AND HELM, ROBERT A. The use of mephenesin in controlling the spasms of tetanus, 791

BILLING, BARBARA H. (*See* SCHIFF, GALL, AND BILLING), 946

BILLINGS, CARL E. (*See* RHOADS, BILLINGS, AND ADAIR), 942

BIRKELAND, JORGEN M. (*See* BRANDT AND BIRKELAND), 793

BLOCH, ROBERT G., VENNESLAND, KIRSTEN, AND CURNEY, CLIFFORD. The effect of cortisone on tuberculosis in the guinea pig, 133

BLOCK, MATTHEW, JACOBSON, LEON O., AND NEAL, WILLIAM. Biologic studies with arsenic^{76}. IV. The histopathologic effects of arsenic^{76} in patients with leucemia and related diseases, 792

BLOOD, JANE P. (*See* CONN, LOUIS, FAJANS, JOHNSON, BARROTT, HOGG, BLOOD, AND WEISS), 799

BLOUNT, GILBERT, JR., AND ANDERSON, LEIGHTON L. Pulmonary hemodynamics in chronic pulmonary disease, 792

BOLLMAN, JESSE L. (*See* GROTTE, KNUTSON, AND BOLLMAN), 577

BOND, E. E. (*See* LAST, MCDONALD, JONES, AND BOND), 827

BOND, WILLIAM H. (*See* ROHN AND BOND), 944

BOOKMAN, JOHN J. (*See* POLLACK AND BOOKMAN), 561

BORDEN, CRAIG W. (*See* EBERT, WILSON, BORDEN, PEARSON, AND FALK), 806

BORTOLOTTI, THERESA R. (*See* BUCKLEY, GIBSON, AND BORTOLOTTI), 751

BOURONCLE, BERTHA A. (*See* WRIGHT, DODD, BOURONCLE, ELLIOTT, BAXTER, AND BASS), 962

BOYD, HARRIET M. Quantitative estimation of the rickettsial antigens in infected yolk sac membranes by complement fixation using a fifty per cent hemolysis technique, 313

BOYLE, A. J. (*See* ZAK, WILLARD, MYERS, AND BOYLE), 964

BRANDT, NOREEN G., AND BIRKELAND, JORGEN M. Studies on the leucocytic changes during the tuberculin reaction, 793

BRAUDE, ABRAHAM I., SANFORD, JAY P., BARTLETT, JANE E., AND MALLERY, O. T., JR. Effects and clinical significance of bacterial contaminants in transfused blood, 794

BRAUER, R. W. (*See* LEVIN AND BRAUER), 474

SUBJECT INDEX

A

Acid hematin and Evans blue (T-1824) in tissue hemogenates, quantitative measurement of, 286
ACTH administration, nephrotic syndrome under, serum lipid analysis in, 414
and cortisone, clinical trials of, in blood dyscrasias, 922
effects of, on renal tubular transport of uric acid, phosphorus, and electrolytes in normal renal and adrenal function, 533
therapy, metabolic evaluation of simultaneous, 953
in experimental poliomyelitis in monkeys and mice, 344
influence of, on resistance of monkeys to Yale SK strain in poliomyelitis virus, 359
nephrosis treated with, electrophoretic studies on serum and urine proteins in, 407
treatment of acute attack of gout, 961
Actinomycosis infections, experimental, in mice, effect of aureomycin and penicillin on, 101
Adrenal cortex, effect of colchicine on, 921
cortical dysfunction, diagnosis of, two new tools for, 817
extract, an aqueous, clinical and laboratory studies of, 952
steroids, catabolism of, after intramuscular and oral administration, 808
Adrenocortical hormones, urinary excretion of, in surgical patients provided supplements of ascorbic acid, 802
steroids, direct action of, on connective tissue, evidence of, 805
Agglutinogens, Rh, Lewis, and H, influence of heat upon, 402
Agranulocytosis, fatal, resulting from procaine derivative, 850
Alcohol, determining, in biological fluids, specificity of the desiccation method for, 762
Amebiasis, diagnosis of, role of the complement fixation test, and the incidence of, in the Chicago area, 804
Amines in experimental hypertensions, 935
Aminophylline, cardiac output versus theophylline blood levels following administration of, 934
effect of, on cerebral hemodynamics in presence of cardiac failure and Cheyne-Stokes respiration, 933
Ammonia, nitrogen liberated as, microdiffusion method for determination of, 324
Amylase activity in pancreatic juice, photometric determination of, 148
Androstenediol, clinical and hormonal response of patients with advanced breast cancer to, 950
Anemia, hemolytic, evidence of a, exacerbated by X-irradiation in cancer, 951
significance of hemoglobinemia and associated hemosiderinuria, with particular reference to various types of, 829
in acute experimental beryllium poisoning, 173
of chronic primary bone marrow failure, studies on, 923
pernicious, vitamin B_{12} in, maintenance therapy with, 797
vitamin B_{12}, absorption, utilization, and excretion of, 84
Anesthesia, D-tubocurarine chloride concentrations in human plasma after intravenous injection during, 397
oxygen and carbon dioxide levels during, influence of, upon postsurgical hepatic damage, 388
spinal, hemodynamic changes following induction of low and high, 924
Anionic detergents, inhibition of bacterial growth by adsorbed, 163
Antibiotics and sulfonamides, in vitro activity of, against microorganisms of the urinary tract, 942
comparison of in vitro sensitivity of freshly isolated pathogenic bacteria to, 620
cross-resistance to, 719
sensitivity of bacteria to, turbidimetric method for determining, 289
Antibodies, microestimation of, with one milliliter samples and antisera of low antibody content, 157
Antibody-antigen precipitates, toxicity of, 798
Anticoagulant, circulating, characteristics of an unusual, 254
therapy, controlled prothrombin time and, with use of a simple inexpensive apparatus, 642
Antigens, rickettsial, in infected yolk sac membranes, quantitative estimation of, by complement fixation using a fifty per cent hemolysis technique, 313
Antihistamine, Neohetramine, alleged sedative effect of, 873
Antipyrine space in edematous states, measurement of, 827
Antistreptolysin test, modification of, 648
Aorta, coarctation, hemodynamics in, study of, using dye dilution and direct intra-arterial pressure recording methods, 785, 858
Arsenic^{76}, biologic studies with, 792
Arterial pulse wave, 823
Arteries, pulmonary, reaction of, to minute emboli, experimental study, 823
Atherosclerosis, 807

Atropine substitute, synthetic, action of a, in normal individuals, 238
Aureomycin and penicillin, effect of, on experimental actinomycosis infections in mice, 101
in vitro sensitivity of freshly isolated pathogenic bacteria to, 620
Auricular fibrillation and auricular flutter in man, effect of procaine amide upon, 930

B

Bacteria, effect of repeated exposure of, to antibiotics, 719
in vitro sensitivity of freshly isolated pathogenic, comparison of, to terramycin and other antibiotics, 620
sensitivity of, to antibiotics, turbidimetric method for determining, 289
Bacterial contaminants in transfused blood, effects and clinical significance of, 794
growth, inhibition of, by adsorbed anionic detergents, 163
Ballistocardiogram, deep K stroke, studies in nature of, 796
Ballistocardiograph, low-frequency, serial observations with, in congestive heart failure, 823
torsion, discrimination of cardiac forces with, 804
"Basophil failure," a syndrome characterized by failure of ACTH and gonadotropin secretion associated with intact thyrotropin secretion, 924
BCG vaccination program, fourteen years of a clinically controlled, 944
Benadryl and ACTH, effect of, on hypotension produced by intravenous histamine, 817
Benemid, effect of, on blood levels of PAS, 227
treatment of gout, 936
Beryllium poisoning, acute experimental, anemia in, 173
Biliary tract obstruction, incomplete, serum alkaline phosphatase in, importance of serial determinations of, 693
Bilirubin determinations, serum, one-minute and total, normal and abnormal variations and clinical significance of, 448
Biochemical studies on leucocytes. I. Phosphatase activity in health, leucocytosis, and myelocytic leucemia, 39
II. Phosphatase activity in chronic lymphatic leucemia, acute leucemia, and miscellaneous hematologic conditions, 245
with the "citrovorum factor," 95
Biuret reaction for determination of proteins, improved reagent and its application, 474
Blood, anticoagulant, circulating, characteristics of an unusual, 254
Blood—Cont'd
cell counts, white, in the leucemias, 789
clot density, spectrophotometric studies on, 28
coagulation and thrombin time, comparative effects of heparin and Paritol-C upon, and upon the plasma antithrombin level, 542
dyscrasias, ACTH and cortisone in, clinical trials of, 922
enzyme studies on human. XI. The isolation and characterization of thromboplastic cell and plasma components, 11
XII. Thromboplastic plasma component and other coagulation factors in hemophilia, 23
eosinophil count in peripheral, effect of rutin on, in normal subjects, 709
flow through nonventilated portions of normal and diseased lung, determination of, 806
glycolysis, effect of dietary deprivation of potassium on, 78
human, stored in plastic bags, studies on, 933
leucemia, phosphatase activity in, 245
leucocytes, biochemical studies on, 39
levels and tissue fluid of penicillin, relationship of, 712
folic acid, effect of folic acid on the cholinesterase activity of the blood and, 183
of PAS, effect of Benemid on, 227
para-aminosalicylic acid, effects of carinamide on, 815
mucoproteins of, studies on, 921
neon-tungsten cuvette oximeter for whole, 777
occult, in feces, detection of, including observations on ingestion of iron and whole blood, 433
phosphatase activity in health, leucocytosis, and myelocytic leucemia, 39
plasma, D-tubocurarine chloride concentrations in human, after intravenous injection during anesthesia, 397
pressure, central nervous mechanism adjusting, by humoral means, 943
Rh, Lewis, and H agglutinogens, influence of heat upon, 402
serum, chemical lipid fractions of, correlation of, with Gofman's macromolecules (Sf 10-20), 824
cholesterol in, esterification of, investigation of, 957
thrombocytopenic factor in, demonstration of, in thrombocytopenic purpura, 1
thromboplastic cell and plasma components, isolation of, 11
plasma component and other coagulation factors in hemophilia, 23
transfused, bacterial contaminants in, effects and clinical significance of, 794
Bone marrow and liver, porphyrins of, study of, in various forms of porphyria, 946

Bone marrow—Cont'd
failure, anemia of chronic primary, studies on, 923
Brain oxidations, comparative in vitro study of guinea pig, as influenced by xenon and nitrous oxide, 384
Breast cancer, clinical and hormonal response of patients with advanced, to androstenediol, 950
Bromsulfalein, plasma clearance rate of, as a dynamic indicator of human hepatocellular function, 801
prolonged retention of, in patients with regurgitation jaundice, 210
test of hepatic function, effect of enterohepatic circulation on, 583

C

Cage, trap-transport, for monkeys, an improved, 495
Calcium and magnesium in plasma, simplified titrimetric techniques for assay of, 751
Calibrator for determining volume of Warburg vessel plus manometer, 767
Cancer, breast, clinical and hormonal response of patients with advanced, to androstenediol, 950
human serum tributyrinase levels in, 613
Cardiac catheterization, venospasm during, local procaine block as an added measure to overcome, 638
conduction system of dog, combined microscopic and functional studies on, 955
lesions resembling acute rheumatic carditis, production of, by streptococcal infection and a modification of the Shwartzman reaction, 955
output and Evans blue space in man, estimation of, using an oximeter, 588
in acute myocardial infarction, further studies on, 813
Cardiovascular changes associated with the Valsalva maneuver, genesis of, in normal persons, 807
disease, psychogenic dyspnea in, 816
dynamics, normal and abnormal, a model demonstrating, 267
Carinamide, effects of, on para-aminosalicylic acid blood levels, 815
Catabolism of adrenal cortical steroids after intramuscular and oral administration, 808
Catheterization, intravenous, simplified technique for, 919
Cation and anion exchange resins, uptake of ions by various mixtures of, 925
exchange resins, their optimal potassium content for clinical use, 199
Central Society for Clinical Research, transactions of twenty-fourth annual meeting, Chicago, Ill., Nov. 2 and 3, 1951, 783, 921
Cerebrospinal fluid, sodium and potassium concentration in human, normal values, 574
Chemotherapeutic agents, relation between resistance to, and other biochemical properties of some viridans streptococci and enterococci, 881
Chloramphenicol, in vitro sensitivity of freshly isolated pathogenic bacteria to, 620
serum concentrations of, following intravenous and intramuscular administration, 234
Chloric acid method for determination of protein-bound iodine, 964
Chloride, determination of, by mercurimetric titration, effect of serum proteins on, 161
Cholesterol in blood serum, esterification of, investigation of, 957
Choline in liver diseases, urinary excretion of trimethylamines and, after intravenous administration, 904
intestinal absorption of, effect of liver damage upon, 938
or methionine, effect of single large doses of, on phospholipid turnover in normal human subjects maintained on a low-protein diet for seven days, 705
Cholinesterase activity of blood, effect of intravenous folic acid on, 183
Circulating anticoagulant, characteristics of an unusual, 254
Circulation, enterohepatic, effect of, on bromsulfalein test of hepatic function, 583
Cirrhosis, development of, in fatty vacuolization of the liver, 946
"Citrovorum factor," biochemical studies with, 95
Clot density, spectrophotometric studies on, 28
Coagulation factors in hemophilia, thromboplastic plasma component and other, 23
histamine activity, intravenous, further studies on, 818
Coarctation of aorta, hemodynamics in, study of, using dye dilution and direct intra-arterial pressure recording methods, 858
Colchicine, effect of, on adrenal cortex, 921
Colitis, ulcerative, chronic, clinical and bacteriologic response to a new preparation of aureomycin, 954
Compound F (17-hydroxycorticosterone) and compound F acetate, metabolic effects of orally parenterally administered, 799
Coronary artery insufficiency, objective method of drug evaluation in, results with Khellin, 788
Cortisone and ACTH, effects of, on renal tubular transport of uric acid, phosphorus, and electrolytes in normal renal and adrenal function, 533
effect of, in streptococcal lymphadenitis and pneumonia, 363

Cortisone, effect of—Cont'd
in subcutaneous nodules of rheumatoid arthritis, 787
in tuberculosis in guinea pig, 133
in vascular reaction to large doses of horse serum using the rabbit ear chamber technique, in vivo observations of, 497
in rheumatoid arthritis, electrophoretic studies on serum of patients treated with, 526
importance of dosage in prolonged oral administration of, 937
Corynebacterium diphtheriae, testing virulence of, the re-use of rabbits for, 492
Creatine values in blood and muscle as affected by heart failure, 954
Cyanide poisoning, nitrite and thiosulfate treatment in, results of, 797

D

DBA mice, peritoneal fluid in, cellular composition of, after intraperitoneal injection of normal or malignant human cells, 846
Decalcification, electrolytic, by one-day battery charger, 166
Dermatitis, seborrheic, a local metabolic defect involving pyridoxine, 948
Desiccation method for determining alcohol in biological fluids, specificity of, 762
Desoxycorticosterone and progesterone in genesis of experimental toxemia of pregnancy, 926
Dextrans of different molecular sizes, diffusion of, to lymph and urine, 577
Diabetes mellitus in Kimmelstiel-Wilson disease, characteristics of, 801
Diabetic coma, renal function in, 12
Diabetogenic action of organic reagents, 671
Dietary deprivation of potassium, effects of, on heart glycogen and on blood glycolysis, 78
Diffusion of dextrans of different molecular sizes to lymph and urine, 577
D-tubocurarine chloride concentrations in human plasma after intravenous injection during anesthesia, 397
Duffy factor, effect of trypsin on, 188
Dyspnea, psychogenic, in cardiovascular disease, 816

E

Electrocardiograms, precordial, comparative value of, obtained with CF and V leads, 961
Electrocardiographic changes following carotid sinus stimulation in paroxysmal supraventricular tachycardia, 820
leads, experimental studies on, using fluid mappers, 928
Electrolytic decalcification by a one-day battery charger, 166
Electrostethography, calibrated, for localization of heart sounds and murmurs over the precordium, 805
Elkosin, absorption, distribution, and excretion of, in man, observations on, 420
Endogenous phosphate, metabolism of, acute effects of parathyroid hormone on, 112
Enterohepatic circulation, effect of, on bromsulfalein test of hepatic function, 583
Enzyme studies on human blood. XI. The isolation and characterization of thromboplastic cell and plasma components, 11
XII. Thromboplastic plasma component and other coagulation factors in hemophilia, 23
Eosinophil count in peripheral blood, effect of rutin on, in normal subjects, 709
response tests, four-hour, clinical and statistical evaluation of, 790
Erythrocyte, trypsinized, study of the physical, phagocytable, and immunologic aspects of, 962
Evans blue (T-1824) and acid hematin in tissue hemogenates, quantitative measurement of, 286
space and cardiac output in man, estimation of, using an oximeter, 588
Exercise tolerance test, unusual precordial lead patterns in, 926

F

Fat emulsion, artificial, and intravenously injected fatty chyle, morphologic distribution of, in rats and dogs, 56
Feces, occult blood in, detection of, including observations on ingestion of iron and whole blood, 433
Folic acid, intravenous, effect of, on cholinesterase activity of blood and folic acid blood levels, 183
Fructose and glucose, distribution of, in total body water after intravenous injection, 958
metabolic effects of, comparison of, administered intravenously to normal and diabetic subjects, 931
in liver, metabolism of, in normal and diabetic subjects, 800
metabolism of, intravenously administered to normal men, role of the splanchnic bed in, 929
rate of assimilation of, following intravenous administration to patients with diabetic acidosis and total pancreatectomy, 958
Fungi causing pulmonary mycoses, effect of tubercle bacillus concentration procedures on, 486

G

Gamma globulin determinations, turbidimetric and electrophoretic methods, 153
Gastric secretion in man, diurnal and nocturnal variation in, 828
Genitourinary tract secretions, antibacterial substances in, 932
Gentisic acid in serum, method for determination of, 916
Glossitis, pellagrous, tryptophane and, 167
Glucose autoxidation procedure for determination of inulin in presence of high glucose concentrations, 481
Glucuronolactone in treatment of rheumatoid arthritis, clinical evaluation of, 945
Gout, acute attack of, vascular disturbance as the local mechanism of, 961
  treatment of, with Benemid, 936

H

Heart disease, occupational evaluation of persons with, results of an integrative method of, 821
  failure, congestive, low-frequency ballistocardiograph in, serial observations with, 823
    creatine values in blood and muscle as affected by, 954
    intractable congestive, due to myocarditis, 813
  glycogen, effect of dietary deprivation of potassium on, 78
  sounds and murmurs over the precordium, calibrated electrostethography for localization of, 805
Heat, influence of, upon Rh, Lewis, and H agglutinogens, 402
Hemodynamic changes in human beings following induction of low and high spinal anesthesia, studies of, 924
Hemodynamics in coarctation of aorta, study of, using dye dilution and direct intra-arterial pressure recording methods, 858
Hemoglobinemia and associated hemosiderinuria, significance of, with particular reference to various types of hemolytic anemia, 829
Hemolytic anemia, significance of hemoglobinemia and associated hemosiderinuria, with particular reference to various types of, 829
Hemophilia, thromboplastic plasma component and other coagulation factors in, 23
Heparin and Paritol-C, comparative effects of, upon blood coagulation and prothrombin time and upon the plasma antithrombin level, 542
  in delaying thrombophlebitis, use of, 585
  intravenous and subcutaneous administration in same individuals, comparative effects of, 550
Hepatic damage, postsurgical, influence of oxygen and carbon dioxide levels during anesthesia upon, 388
Hepatic—Cont'd
  function, bromsulfalein test of, effect of enterohepatic circulation on, 583
Hepatocellular function, plasma clearance rate of bromsulfalein as a dynamic indicator of, 801
Hereditary spherocytosis: pathogenesis of "acute crisis," 784
Herpes simplex infection, fatal, in newborn infant, 742
Histamine activity in coagulation, intravenous, further studies of, 818
Homogenizer, micro-conical tipped, and its use in analytical procedures, 773
Homologous lungs, respiration maintained by, experimental study of, 281
Hormone, parathyroid, acute effects of, on metabolism of endogenous phosphate, 112
Horse serum, vascular reaction to large doses of, in vivo observations of effects of cortisone on, using the rabbit ear chamber technique, 497, 511
"Hypersplenism," panhematopenia and marrow hyperplasia without, 929
Hypertension, effect of 1-hydrazinophthalazine and hexamethonium on, 949
  essential, treatment of, with dihydrogenated ergot alkaloids, 954
  experimental malignant, protection against hypertension, arteriolonecrosis, and death by hog renal extracts in, 796
  renal, endocrine factors in experimental, 951
Hypertensions, experimental, amines in, 935
Hypertrophy, right ventricular, 810
Hypotension produced by intravenous histamine, effect on Benadryl and ACTH on, 817

I

Idiopathic thrombocytopenic purpura, bone marrow analysis in, 100 cases of, with reference to the prognostic significance of eosinophils and megakaryocytes, 939
Infection, herpes simplex, fatal, in newborn infant, 742
  in radiation injury, role of, 331
Infections, actinomycosis, experimental, in mice, effect of aureomycin and penicillin on, 101
Influenza viruses type A′ and type C, simultaneous recovery of, in a patient, 747
Intraperitoneal transfusion, 819
Inulin and para-aminohippurate clearances, effect of increased renal venous pressure on, 927
  determination of, in presence of high glucose concentrations by the glucose autoxidation procedure, 481
Invert sugar, intravenous infusions of 15 per cent, tolerance of human beings to, 70

Iodine, protein-bound, chloric acid method for determination of, 964
I-131 in urine, small doses of, method for determination of, 470
Ionizing radiations, quantitative changes of leucocytes and platelets in individuals with occupational exposure to, 947
Ions, uptake of, by various mixtures of cation and anion exchange resins, 925
Islets of Langerhans, destructive lesions of, caused by sodium diethyldithiocarbamate and potassium ethylxanthate, 671

J

Jaundice, regurgitation, prolonged retention of bromsulfalein in patients with, 210
total serum lipid and cholesterol levels in, 822

K

Khellin, drug evaluation in coronary artery insufficiency, results with, 788
Kidney function, modified procedure for assessing separate, in chronic dog preparations with observations on effect of chronic unilateral venous congestion, 604
Kimmelstiel-Wilson disease, diabetes mellitus in, characteristics of, 801
Klebsiella pneumoniae, distribution and antibiotic sensitivity in fifty-five strains of, 889

L

Laboratory methods, 148, 267, 470, 631, 916
LE cell formation, dynamics of, as observed in living cells supravitally stained, 944
Leucemia, arsenic[76] in, histopathologic effects of, 792
longevity in, 789
myelocytic, phosphatase activity in, 39
phosphatase activity in, 245
triethylene melamine therapy in, clinical results and complications of, 785
Leucemias, white blood cell counts in, 789
Leucocytes and platelets, quantitative changes of, in individuals with occupational exposure to ionizing radiations, 947
biochemical studies on. I. Phosphatase activity in health, leucocytosis, and myelocytic leucemia, 39
II. Phosphatase activity in chronic lymphatic leucemia, acute leucemia, and miscellaneous hematologic conditions, 245
concentration of leucocytosis-producing factor from, 959
Leucocytic changes during tuberculin reaction, studies on, 793
Leucocytosis, phosphatase activity in, 39
Leucopenia, nitrogen mustard-induced, compounds capable of modifying, some structural requirements of, 960
Liver, cirrhosis of, refeeding (nutritional) gynecomastia in, 825
damage, effect of, upon intestinal absorption of choline, 938
experimental, relation between serum and hepatic enzymes in, 825
disease and malignancy, cholinesterase determination in, usefulness of, 932
diseases, choline in, urinary excretion of choline and trimethylamines after intravenous administration, 904
fatty vacuolization of, development of cirrhosis in, 946
function, impairment of, subsequent to injury to the spinal cord, 689
metabolism of fructose in, of normal and diabetic subjects, 800
tissue, potassium in, determination of, 640
Lung, blood flow through nonventilated portions of normal and diseased, determination of, 806
Lungs, homologous, respiration maintained by, experimental study of, 281
Lymph and urine, diffusion of dextrans of different molecular sizes to, 577

M

Malignant diseases, therapy of, with proteinamine, 794
Manometer, a mechano-electronic transducer, 631
Melanomas, lack of selective uptake of radioactive iodine, phosphorus, and copper by, 786
Melioidosis, chronic, bacteriologic and clinical correlation in diagnosis, 374
Mephenesin in controlling spasms of tetanus, 791
Merthiolate, effect of, on infectivity of certain viruses, 483
Metabolism of endogenous phosphate, acute effects of parathyroid hormone on, 112
of fructose in liver of normal and diabetic subjects, 800
intravenously administered to normal men, role of the splanchnic bed in, 929
protein, riboflavin excretion as a function of, in normal, catabolic, and diabetic human being, 561
Microestimation of antibodies in human sera, 157
Middlebrook hemagglutination test for tuberculosis, 736
Mucoproteins of blood, studies on, 921
Myelocytic leucemia, phosphatase activity in, 39

Myocardial infarction, cardiac output in acute, further studies on, 813
occurring postoperatively, study of, 963
Myocarditis, intractable congestive heart failure due to, 813

N

NA^{24}, intravascular distribution of, injected intravenously in man, 893
Naphuride sodium in treatment of psoriasis, 945
Neohetramine, alleged sedative effect of, 873
Neon-tungsten cuvette oximeter for whole blood, 777
Nephrosis treated with ACTH, electrophoretic studies on serum and urine proteins in, 407
Nephrotic syndrome under ACTH administration, serum lipid analysis in, 414
Neurohypophysis, radioactive *l*-thyroxine in, localization of, 663
Nitrite and thiosulfate treatment in cyanide poisoning, results of, 797
Nitrogen liberated as ammonia, microdiffusion method for determination of, 324

O

Owren's disease, report of case, 842
Oximeter, a neon-tungsten cuvette, for whole blood, 777
in estimation of cardiac output and Evans blue space in man, 588
Oxygen and carbon dioxide levels during anesthesia, influence of, upon postsurgical hepatic damage, 388

P

Pancreatic juice, amylase activity in, photometric determination of, 148
Panhematopenia and marrow hyperplasia without "hypersplenism," 929
Parahemophilia (Owren's disease), report of case, 842
Para-hydroxypropiophenone, antithyrotrope and antigonadotrope activity of, in human beings, 941
Parathyroid hormone, acute effects of, on metabolism of endogenous phosphate, 112
Parenteral fluids, prolonged use of, magnesium, potassium, phosphorus, chloride, and vitamin deficiency as result of, 809
Paritol-C and heparin, comparative effects of, upon blood coagulation and prothrombin time and upon the plasma antithrombin level, 542
PAS, blood levels of, effect of Benemid on, 227
effect of, on development of resistance of tubercle bacilli to streptomycin, 814
Pellagrous glossitis, tryptophane and, 167
Pels-Macht test, critical evaluation of, 128
Pemphigus serum, toxicity of, critical evaluation of, 128
Penicillin and aureomycin, effect of, on experimental actinomycosis infections in mice, 101
effect of repeated exposure of bacteria to, 719
in vitro sensitivity of freshly isolated pathogenic bacteria to, 620
tissue fluid and blood levels of, relationship of, 712
Peritoneal fluid in DBA mice, cellular composition of, after intraperitoneal injection of normal or malignant human cells, 846
Pernicious anemia, vitamin B_{12} in, maintenance therapy with, 797
Phenol, cutaneous absorption of, 262
Pheochromocytoma, Regitine (C7337) as a new pharmacologic test for, evaluation of, 812
Phospholipid turnover in normal subjects maintained on a low-protein diet for seven days, effect of single large doses of choline or methionine on, 705
Photometric determination of amylase activity in pancreatic juice, 148
Plasma, calcium and magnesium in, simplified titrimetric techniques for assay of, 751
Pneumonia, effect of cortisone in, 363
Poliomyelitis, experimental, ACTH in, 344
virus, Yale SK strain in, influence of ACTH on resistance of monkeys to, 359
"Porphyria," experimental, in rabbits, 949
various forms of, study of porphyrins of bone marrow and liver in, 946
Potassium and sodium concentration in human cerebrospinal fluid, normal values, 574
dietary deprivation of, effects of, on heart glycogen and on blood glycolysis, 78
in liver tissue, determination of, 640
Pre-eclampsia-eclampsia, etiology of, 803
Prerenal azotemia, diseases associated with so-called, diurnal renal function patterns in, 956
Procaine amide, effect of, upon auricular fibrillation and auricular flutter in man, 930
block, local, as an added measure to overcome venospasm during cardiac catheterization, 638
derivative, fatal agranulocytosis resulting from, 850
Protein metabolism, riboflavin excretion as a function of, in normal, catabolic, and diabetic human being, 561
Proteinamine therapy of malignant diseases, 794
Proteins, biuret reaction for determination of, improved reagent and its application, 474

Proteins—Cont'd
serum and urine, in nephrosis treated with ACTH, electrophoretic studies on, 407
Prothrombin time, controlled, and anticoagulant therapy with use of a simple inexpensive apparatus, 642
Pseudomonas and proteus, infections due to, developing during antibiotic therapy, 963
Psoriasis, naphuride sodium in treatment of, 945
Pulmonary arteries, reaction of, to minute emboli, experimental study of, 823
hemodynamics in chronic pulmonary disease, 792
mycoses, fungi causing, effect of tubercle bacillus concentration procedures on, 486
tuberculosis, simultaneous occurrence of plasma cell multiple myeloma and Boeck's sarcoid in, 798
Pulse wave, arterial, 823
Punch biopsy of synovial membrane, diagnostic value of, 937
Purpura, thrombocytopenic, blood in, demonstration of thrombocytopenic factor in, 1

Q

Quinine and quinidine, metabolic and physiologic effects of, on cardiovascular system, 935

R

Radiation injury, infection in, role of, 331
Radioactive iodine, phosphorus, and copper, lack of selective uptake of, by melanomas in mouse and man, 786
l-thyroxine in neurohypophysis, localization of, 663
Radiochlorine and radiosodium, estimation of time of equilibrium of distribution of long-life, in man with and without chronic congestive heart failure, 940
Radium chloride, twenty-year follow-up study of patients injected with, 820
Reagents, diabetogenic action of organic, 671
Refractory anemia, studies on, 923
Regitine (C7337), evaluation of use of, as new pharmacologic test for pheochromocytoma, 812
Regurgitation jaundice, prolonged retention of bromsulfalein in patients with, 210
Renal excretion of thiocyanate, 194
function in diabetic coma: lower nephron nephrosis without oliguria, 12
hemodynamics, effect of l-nor-adrenaline on, 940
hypertension, endocrine factors in experimental, 951
tubular transport of uric acid, phosphorus, and electrolytes in normal renal and adrenal function, effects of ACTH and cortisone on, 533
Renal—Cont'd
venous pressure, effect of increased, on inulin and para-aminohippurate clearances, 927
Resins, cation exchange, their optimal potassium content for clinical use, 199
Respiration maintained by homologous lungs, experimental study of, 281
Rheumatoid arthritis, cortisone in, importance of dosage in prolonged oral administration of, 937
8-aminoquinolines in treatment of, effect of certain, 795
electrophoretic studies on the serum of patients treated with cortisone, 526
glucuronolactone in treatment of, clinical evaluation of, 945
joint fluid in, effects of ACTH and cortisone on, 805
subcutaneous nodules, effect of cortisone on, 787
Riboflavin excretion as a function of protein metabolism in normal, catabolic, and diabetic human beings, 561
Rickettsial antigens in infected yolk sac membranes, quantitative estimation of, by complement fixation using a fifty per cent hemolysis technique, 313
Rutin, effect of, on eosinophil count in peripheral blood of normal subjects, 709

S

Seborrheic dermatitis, a local metabolic defect involving pyridoxine, 948
Sensitivity, antibiotic, in fifty-five strains of Klebsiella pneumoniae, distribution of, 889
Sera, gamma globulin determinations, turbidimetric and electrophoretic methods, 153
Serum alkaline phosphatase in incomplete biliary tract obstruction, importance of serial determinations of, 693
and urine proteins in nephrosis treated with ACTH, electrophoretic studies on, 407
bilirubin determinations, clinical significance of the one-minute and total, normal and abnormal variations and, 448
cholinesterase determination in liver disease and malignancy, usefulness of, 932
concentrations of chloramphenicol following intravenous and intramuscular administration, 234
gentisic acid in, method for determination of, 916
lipid analysis in nephrotic syndrome under ACTH administration, 414
of rheumatoid arthritis patients treated with cortisone, electrophoretic studies on, 526

Serum—Cont'd
pemphigus, toxicity of, critical evaluation of, 128
proteins, effect of, on determination of chloride by mercurimetric titration, 161
tributyrinase levels in cancer, 613
in normal human, 308
in tuberculosis, 428
Shwartzman reaction, inhibition by nitrogen mustard of the generalized, and of bilateral renal cortical necrosis produced with S. marcescens toxin in cortisone-treated rabbits, 815
Skin temperature, measurements of, comparison of differential, using a radiometer, resistance thermometer, and thermocouples, 557
Sodium and potassium concentration in human cerebrospinal fluid. I. Normal values, 574
diethyldithiocarbamate and potassium ethylxanthate, destructive lesions of islets of Langerhans caused by, 671
diets, low, urinary chloride in, one-tablet test for, 275
Spatial vectorcardiogram of normal young men, evaluation of, 783
vectorcardiography, 826
Spectrophotometric studies on clot density, 28
Spherocytosis, hereditary: pathogenesis of "acute crisis," 784
Spinal cord, injury to, impairment of liver function subsequent to, 689
Stirrer, ultra-micro rotating, 660
Streptococcal lymphadenitis, effect of cortisone in, 363
Streptomycin, effect of repeated exposure of bacteria to, 719
in vitro sensitivity of freshly isolated pathogenic bacteria to, 620
resistance of tubercle bacilli to, effect of PAS on development of, 814
Stress studies on auto race drivers, 523
Sugar, intravenous infusions of 15 per cent invert, tolerance of human beings to, 70
Sweating, effect of, on normo- and hypertensive subjects, 811
Syndrome resembling toxemia of pregnancy, experimental production of, 213
Synovial membrane, punch biopsy of, diagnostic value of, 937

T

Tachycardia, paroxysmal supraventricular, carotid sinus stimulation in, electrocardiographic changes following, 820
postoperative supraventricular, incidence, causes, and treatment, 943
Temperature, skin, measurements of, a comparison of differential, using a radiometer, resistance thermometer, and thermocouples, 557
Terramycin, in vitro sensitivity of freshly isolated pathogenic bacteria to, 620
treatment of chronic typhoid carriers with, 617
Test, antistreptolysin, modification of, 648
for tuberculosis, Middlebrook hemagglutination, 736
for urinary chloride in low sodium diets, a simple one-tablet, 275
4-sodium chloride, for diagnosis of preeclampsia, 803
Pels-Macht, critical evaluation of, 128
Tetanus, spasms of, mephenesin in controlling, 791
Thiocyanate, renal excretion of, 194
Thonzylamine hydrochloride, alleged sedative effect of, 873
Thrombin, inactivation of, by plasma antithrombin, 950
Thrombocytopenic purpura, blood in, demonstration of thrombocytopenic factor in, 1
Thrombophlebitis, heparin in delaying, use of, 585
Thromboplastin and thrombin, intravenous injection of, effect of, in dogs, 784
Thyroxin, micro quantities of, radiochemical method for determination of, 827
Tissue fluid and blood levels of penicillin, relationship of, 712
hemogenates, Evans blue (T-1824) and acid hematin in, quantitative measurement of, 286
Titration, mercurimetric, determination of chloride by, effect of serum proteins on, 161
Torsion ballistocardiograph, discrimination of cardiac forces with, 804
Toxemia of pregnancy, experimental, desoxycorticosterone and progesterone in the genesis of, 926
syndrome resembling, experimental production of, 213
Toxicity of antibody-antigen precipitates, 798
of pemphigus serum, critical evaluation of, 128
Transducer manometer, a mechano-electronic, 631
Transfusion, intraperitoneal, 819
Trap-transport cage for monkeys, an improved, 495
Tributyrinase levels in cancer, 613
in normal human serum, 308
in tuberculosis, 428
Triethylene melamine therapy in leucemia and allied disorders, clinical results and complications of, 785
Trypsin, effect of, on Duffy factor, 188
Trypsinized erythrocyte, study of the physical, phagocytable, and immunologic aspects of, 962
Tryptophane and pellagrous glossitis, 167
Tubercle bacilli, resistance of, to streptomycin, effect of PAS on development of, 814

Tubercle—Cont'd
bacillus concentration procedures, effect of, on fungi causing pulmonary mycoses, 486
Tuberculin reaction, leucocytic changes during, 793
Tuberculosis in guinea pig, effect of cortisone on, 133
Middlebrook hemagglutination test for, 736
pulmonary, simultaneous occurrence of plasma cell multiple myeloma and Boeck's sarcoid in, 798
tributyrinase levels in, 428
Typhoid carriers, chronic, treatment of, with terramycin, 617

U

Ultra-micro rotating stirrer, 660
Uric acid, phosphorus, and electrolytes, renal tubular transport of, in normal renal and adrenal function, effects of ACTH and cortisone on, 533
Urinary chloride in low sodium diets, a simple one-tablet test for, 275
formaldehydogenic corticoids, apparatus for determination of, 780
Urine, I-131 in, method for determination of small doses of, 470

V

Valsalva maneuver, cardiovascular changes associated with, in normal persons, genesis of, 807
Vascular reaction to large doses of horse serum using the rabbit ear chamber technique, in vivo observations on effects of cortisone on, 497, 511
Vectorcardiogram, spatial, of normal young men, an evaluation of, 783
Vectoreardiography, spatial, 826
Venospasm during cardiac catheterization, local procaine block as an added measure to overcome, 638
Venous catheterization for continuous parenteral fluid therapy, 585
Ventricular hypertrophy, right, 810
Viridans streptococci and enterococci, biochemical properties of, relation between resistance to chemotherapeutic agents and other, 881
Virus, poliomyelitis, Yale SK strain in, influence of ACTH on resistance of monkeys to, 359
Viruses, infectivity of certain, effect of Merthiolate on, 483
influenza, type A′ and type C, simultaneous recovery of, in a patient, 747
Vitamin B_{12}, absorption, utilization, and excretion of, 84
maintenance therapy with, in pernicious anemia, 797

W

Warburg vessel plus manometer, calibrator for determining volume of, 767

X

Xenon and nitrous oxide, brain oxidations influenced by, comparative in vitro study of, in guinea pigs, 384
X-irradiation in cancer, evidence for a hemolytic anemia exacerbated by, 951

Y

Yale SK strain in poliomyelitis virus, influence of ACTH on resistance of monkeys to, 359
